LL01, Continued Improvement of Liver Surgery

Professor Sheung Tat Fan is currently the Director of Liver Surgery & Transplant Centre at Hong Kong Sanatorium & Hospital, Hong Kong and Emeritus Professor of The University of Hong Kong.

Fellow of four surgical colleges and holder of four doctorate degrees, Professor Fan researched and published extensively on diseases that are commonly seen in Asia, namely, hepatocellular carcinoma, hepatitis B, cirrhosis, intrahepatic stones and acute biliary pancreatitis. He has authored more than 800 articles to date.

According to ISI Essential Science Indicators, Professor Fan ranks top 1% scientists in clinical medicine by citations in the world. In 1991, Professor Fan performed the first successful liver transplant in Hong Kong. In 1996, he pioneered the technique of adult-to-adult living donor liver transplantation using a right liver graft. This innovative procedure helped ease the continuing problem of organ shortage in adult patients. The operation is now widely adopted and is regarded as a major breakthrough in the history of liver transplantation.

In 2005, Professor Fan was elected as an Academician of Chinese Academy of Engineering, China. In 2008, he was awarded the TTS-Genzyme Award for Innovation in Surgery and Technology by The Transplantation Society.
